SUBJECT INDEX

Absolute reaction rates theory, and creep failure of polymeric filaments, 447
Acyl chain, effect on copolymerization of vinyl esters, 213
Alkyl polymethacrylate-methacrylic ester, intrinsic viscosity and polymerization speed, 387
Amorphous polymers, volume-temperature relation, 579
Amylopectins, corn, light scattering study, 57
  flow birefringence, 67
  statistical model, 7
Benzoyl peroxide, decomposition in dilute solutions, 133
Butadiene, copolymerization with trialkyl aconitates, 437
Cation-exchange resin, conductivity, 507
Cation exchangers, 567
Cationic polymerization, induction period of styrene-stannic chloride-benzene system, 581
Cellulose, acid hydrolysis, 205
  alkali, structural changes during aging, 397
  cotton III, methanolysis and hydrolysis, 29
  polyacrylonitrile fibers, 181
  solutions, in acid, light scattering measurements, 218
Cellulose acetate-polyacrylonitrile fibers, 155
Chain molecules, measurement, 101
  solutions, flow birefringence, 216
p-Chlorophenol, condensation with formaldehyde, 75
Corn amylopectin, light scattering study, 57
Cotton cellulose III, methanolysis and hydrolysis, 29
Counterion fixation, by polyelectrolytes, 477
Creep failure, of polymeric filaments, 447
Crystallization, of fibers, effect on viscoelastic properties, 515
Deoxyribonucleic acid solutions, effect of urea on viscosity, 299
Dextrin, limit, of corn amylopectin, light scattering study, 57
  flow birefringence, 67
Elastomeric films, dilaminar, 267
Electrical analogs, viscoelastic systems, 371
Electron-exchange polymers, 417
Emulsion polymerization, triallyl phosphate with halomethanes, 307
Fibers, containing mixed polymers, 155, 181
  effects of crystallization and drawing on viscoelastic properties of, 515
Filaments, polymeric, application of the absolute reaction rates theory to creep failure of, 447
Flow birefringence, amylopectins and limit dextrins, 67
  of chain molecule solutions, 216
Formaldehyde-phenol polymers, linear, 75
Friedel-Crafts reactions, on polyvinyl chloride, 351
Glycogen, statistical model, 7
Graft polymers, characterization, 317
Halomethanes, for emulsion polymerization of triallyl phosphate, 307
Hydroquinone copolymers, hydrophilic, ion-exchange and electron-exchange behavior, 417
Intrinsic viscosity, methacrylic ester-alkyl polymethacrylate systems, 387
Irradiation, high-energy, for cross linking of polyethylene-type polymers, 115
Ladder structures, for viscoelastic system representation, 123
Latexes, preparation, 225
Light scattering, cellulose solutions in acid, 218
  corn amylopectin, 57
  oriented polyethylene films, 209
  polyethylene, 137, 327
  spherulites, influence of anisotropy on, 413, 578
Limit dextrin, of corn amylopectin, light scattering study, 57
  flow birefringence, 67
Mechanical properties, dynamic, of polymethyl methacrylate, 551
Mercaptan, effect on rate of chain termination for methyl methacrylate, 584
Methacrylic ester-alkyl polymethacrylate, intrinsic viscosity and polymerization speed, 387
Methyl methacrylate, effect of mercaptan on rate of chain termination, 584
  thermal expansion, 591
Molecular orbital theory of reactivity, in radical polymerization, 537

Molecular weight, measurement with gaseous solvents, 415
polymer solutions of unknown concentration, 429
polythene, 223
Oriented polymerizations, 597
Phenol-formaldehyde polymers, linear, 75
Phosgenation, for crosslinking of polyamines, 215
Photopolymerizations, a thermistor method of following, 405
Polyacrylonitrile-cellulose fibers, 181
Polyacrylonitrile-cellulose acetate fibers, 155
Polyamines, crosslinking by phosgenation, 215
1,2-Polybutadiene, crystalline structure, 251
Polychlorotrifluoroethylene, molten, specific volume, 587
Polyelectrolytes, effect of field intensity and quantity of electricity upon counterion fixation by, 477
Polyethylene, crystallites, *a*-axis orientation, 199
films, oriented, light scattering by, 209
fractionation, 495
light scattering, 137, 327
spherulitic fine structure, 202
Polyethylene terephthalate, specific heat, 37
Polyethylene-type polymers, crosslinking by high-energy irradiation, 115
Polyisobutylene, viscoelastic behavior, 89
Polymer melts, supercooled, growth of spherulites from, 211
Polymer solutions, viscosity in fine capillaries, 1
Polymethyl methacrylate, dynamic mechanical properties, 551
Poly-1,3-methyleneindans, 351
Polystyrene, in dioxane, 593
Polythene, long branching and molecular weights, 223
Poly-α,β,β-trifluorostyrene, 485
Polyvinyl chloride, Friedel-Crafts reactions on, 351
Radical polymerization, molecular orbital theory of reactivity, 537
Review
Advances in protein chemistry, Vol. IX, M. L. Anson, K. Bailey, and J. T. Edsall, eds., 370
Rubber, mastication, 235
natural, reaction with hydrofluoric acid, 381
Solid state polymerization, initiated by high-energy electrons, 578
Specific heat, synthetic high polymers, 37
Spherulites, influence of anisotropy on their light scattering, 413, 578
Streaming birefringence, parabolic dependence on velocity gradient, 593
Styrene, polymerization with sulfur as inhibitor, 457
Styrene-stannic chloride-benzene system, induction period in cationic polymerization of, 581
Sulfur, as inhibitor in styrene polymerization, 457
"Syndyotactic polymers," structure, 251
Tensile rupture, hard plastics, 491
Tensile stress, in jets of viscoelastic fluids, 287
Tetramethylthiuramdisulfide, vulcanization, 197
Trialkyl aconitates, copolymerization with butadiene and some vinyl monomers, 437
Triallyl phosphate, emulsion polymerization with halomethanes, 307
Urea, effect on deoxyribonucleic acid solution viscosity, 299
Vinyl esters, effect of size of aryl chain on copolymerization of, 213
Vinyl monomers, polymerization by cold mastication of rubber, 235
Viscoelastic behavior, polyisobutylene, 89
Viscoelastic fluids, tensile stress in jets of, 287
Viscoelastic properties of fibers, effects of crystallization and drawing on, 515
Viscoelastic systems, electrical analogs, 371
representation by ladder structures, 123
Viscometry, nomenclature, 584
Viscosity, of deoxyribonucleic solutions, effect of urea, 299
polymer solutions in fine capillaries, 1
Zinc dimethyldithiocarbamate, formation in vulcanization, 197
